

Streamline Your Orders with a Kitchen Video System!

Perfect for Quick Service Restaurants!

A Kitchen Video System (KVS) from Harbortouch allows your servers or cashiers to quickly relay orders to the kitchen.

- Orders display on a 17" monitor in an easy-to-read queue that can be managed with the included bump pad, allowing the kitchen staff to delete orders as they are completed.
- Each order is listed in detail with modifiers/choices appearing in different colors
- Each order is timed and the clock will turn red when the order time reaches a specified threshold

Contact your sales representative to add KVS to your Harbortouch system today!
